**Subject:** update on flu stats

- 55 cadets currently in isolation for Influenza-Like Illness (ILI) – from a high of 121 cadets on 12July.
- 117 total cadets have been released from isolation and returned to duty – aka 17 more since yesterday.
- 103 cadets have tested positive for H1N1. This is up from yesterday's total of 97, but that is to be expected.
- New cases of ILI are in the single digits now, and have been in the single digits since Monday. We're on the downward trend with single digits in, double digits out, and fewer total cadets in isolation.
